

GradTensor

GUEST KEYNOTE

The Job Market Just Changed. Did You?

A keynote on how AI is reshaping careers, which opportunities are emerging, and what students can do right now to stay ahead.

WHAT THIS TALK COVERS

- The AI acceleration - what changed in the last 12 months
- Jobs disappearing - entry-level and white-collar roles being automated
- Jobs emerging - AI engineer, agent developer, RAG architect
- The K-curve - why builders pull ahead of everyone else
- Your playbook - what to build, learn, and how to stand out

WHY YOUR STUDENTS SHOULD ATTEND

AI is becoming a baseline skill for every engineering role, but most curricula haven't caught up. This talk gives students a clear picture of what's changed and a practical framework for what to do about it.

WHAT STUDENTS WILL TAKE AWAY

- Which skills employers are actually hiring for in AI roles
- Why deployed projects matter more than certificates
- A framework for what to learn, build, and present
- Awareness of new roles emerging in the AI economy

SPEAKER

Prabhu Eshwarla

AI Systems Architect | Author (Manning, Packt)

- 20+ years in engineering and technology leadership
- 2x published author (Manning Publications, Packt)
- Former India Head, HP Software Services Delivery
- Former CTO, European blockchain startup
- Speaker at international tech conferences
- M.E., BITS Pilani
- Creator of mlship, open-source CLI for AI/ML engineers

LOGISTICS

Duration:	60-90 minutes (includes Q&A)
Format:	In-person or virtual
Audience:	Engineering students (all branches, all years)
Cost:	No charge to the institution
